

NU-AIR

VENTILATION SYSTEMS INC.

ENERBOSS FEATURES AND BENEFITS

-Contractor

Features	Benefits
Simplified installation	<ul style="list-style-type: none"> - Simplifies trade coordination - Factory installed pump, check valve, A/C coil - One less vent kit/wall penetration
Factory engineered	<ul style="list-style-type: none"> - No field guesswork - No contractor liability for component integration - No uncertainty about air handler, A/C coil or HRV sizing - Easier load matching for small heat loads
Unitary HRV	<ul style="list-style-type: none"> - Less duct connections - Less space requirements - No negative pressure concerns
Easy commissioning	<ul style="list-style-type: none"> - Fewer measurements/adjustments - Easier air balancing
Simplified servicing	<ul style="list-style-type: none"> - Fewer components – fans, motors, burners - Accessible components
ECM motor technology	<ul style="list-style-type: none"> - Constant CFM - Fewer A/C coil freeze-ups - Improved dehumidification - Lower operating cost (74% < PSC) - Compensates for system static (duct design/dirty filters)
Versatile	<ul style="list-style-type: none"> - Conventional duct system - 3” High-V ductwork - Suitable for RNC, RERE, and conversions
Radiant zone options	<ul style="list-style-type: none"> - Towel warmers - Bathroom floors -
Increased profits	<ul style="list-style-type: none"> - Less callbacks - Satisfied customers/referrals - Leasing options available
